

SELF BONDING SILICONE RUBBER TAPE Specifications

General specification for self-bonding silicone rubber tape. This product has excellent temperature resistance and the inherent chemical resistance of silicone rubber.

Installation and Service Temperature

-55°C to 260°C (-65°F to 500°F)

Material

Silicone rubber

Adhesive

Irreversibly self bonding within 24 hours at room temperature.

Applications

Weather protection, splice sealing

Fluid Resistance

Same as silicone rubber

Flame Rating:

Flame Retardant FAR25.853

SILICONE TAPE Specification 200412

ISO 9001:2000
REGISTERED
