LADISH VALVES

A Heritage Brand

Herman W. Ladish was born in Milwaukee, Wisconsin in 1880 and began his career in the bustling malting industry at the age of 16. Herman quickly established himself in the business, climbing the corporate ladder and assuming the role of superintendent at The American Malting Company. Ladish folklore has it that Herman's interest in metalworking was born from a problematic crankshaft that consistently halted production. Herman's search for an alternative manufacturing method led him to metal forging, and the birth of a metal working conglomerate of forgings, flanges, fittings and industrial valves was born.

Today, Ladish Valves is proud to have a history dating back to 1961 in Cynthiana, Kentucky. After experiencing a crippling flood of the Ohio River and several changes in ownership, Ladish Valves moved its headquarters to Houston in 2007.

With a foundation of more than 60 years of industrial valve production, Ladish Valves continues to be the industry benchmark for stainless steel and high nickel alloy industrial valves. The Ladish Valves trademark symbolizes a reputation that is emblematic of the highest quality standards, unmatched design and metalworking craftsmanship. Our history is important to us and we pay homage to it daily.

The Ladish Valves product line is specifically designed and manufactured to meet the stringent demands of the most corrosive service environments and high temperature applications. Our product is produced under rigorous metallurgical and manufacturing controls that assure a consistent, high degree of performance and dependability. The quality of the material we receive is critical to the quality of our product. With domestic source foundries and strictly monitored international vendors, Ladish Valves is relentless about the quality of materials sourced from its vendor community.

WHAT IT MEANS TO MARK PROGRESS

Ladish Valves is a responsive company that prides itself in being "local" with an exhaustive commitment to our customers and our product.

This means that no matter where you are, our team in Houston will provide a customized, clear response in a timely manner.

We pride ourselves in serving our customers and taking on the challenges of unconventional projects.

LADISH VALVES

Why We're Different

One-stop Manufacturing, Controlled Quality.

Ladish Valves is a premier manufacturer of multi-turn and quarter-turn valves. Our valves are widely used in the chemical and petrochemical markets, spanning from upstream extraction through midstream transportation and downstream processing. Ladish has a long history of supplying products to these markets, in addition to the power and pulp & paper industries.

Ladish has a full complement of value-added services to address the many challenges that often delay projects. Our team specializes in quick turnaround deliveries—even on challenging orders—with the confidence of controlled quality through in-house design and manufacturing.

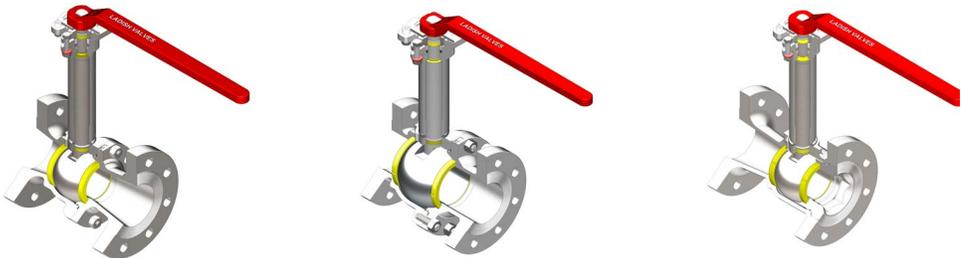

We're a Step Above the Competition. Here's Why.

Ladish is local. Our manufacturing facility is located in Houston, giving us the flexibility to design, machine, assemble, test, verify and expedite our customers' orders—setting us apart from everyone else. Our other differentiators include:

- One of the largest (stocked) stainless and exotic alloy inventories in the U.S.
- In-house machining: Cryo extensions, end connections, modifications, etc.
- Same-day deliveries available
- Custom valve solutions using Ladish engineering & design teams
- Fully compliant clean room (oxygen, chlorine, hydrogen peroxide and others)
- Extensive in-house NDE capabilities

CATALOG 321 CRYOGENIC CAST AND FORGED VALVES

Catalog 321 serves to highlight the Ladish Valves line of low temperature, cryogenic valves and assist piping system designers, engineers, contractors and purchasing personnel in finding the ideal product for their application.

CAST CRYOGENIC FLOATING BALL VALVE

CAST CRYOGENIC GATES, GLOBES AND CHECKS

FORCED CRYOGENIC GATES , GLOBES AND CHECKS

CRYOGENIC CAST & FORGED PRODUCTS

Products for Low Temperature Environments

Ladish Valves stainless steel cryogenic valves are produced to the rigid 'Controlled Quality' standards that assure dependable operating performance at sub-zero temperatures. The production, transport and storage of liquefied gases such as oxygen, nitrogen, natural gas (down to -425°F) demand a thoughtful solution.

Ladish Valves custom design bonnets and modified extended bonnets provide safe, dependable service to LNG receiving terminals and liquification facilities as well as processes using liquid nitrogen and hydrogen. The main structural feature of these valves is the enclosed vapor chamber which isolates the packing from the cryogenic fluid allowing the packing to function properly.

Ladish Valves ability to manufacture specifically designed cryogenic valves and to convert standard valves to cryogenic service, all in-house, allows for a completely controlled quality process. In addition, custom modification requests and any associated non-destructive testing can be expedited. Cryogenic testing per BS 6364 can also be facilitated from our headquarters in Houston.

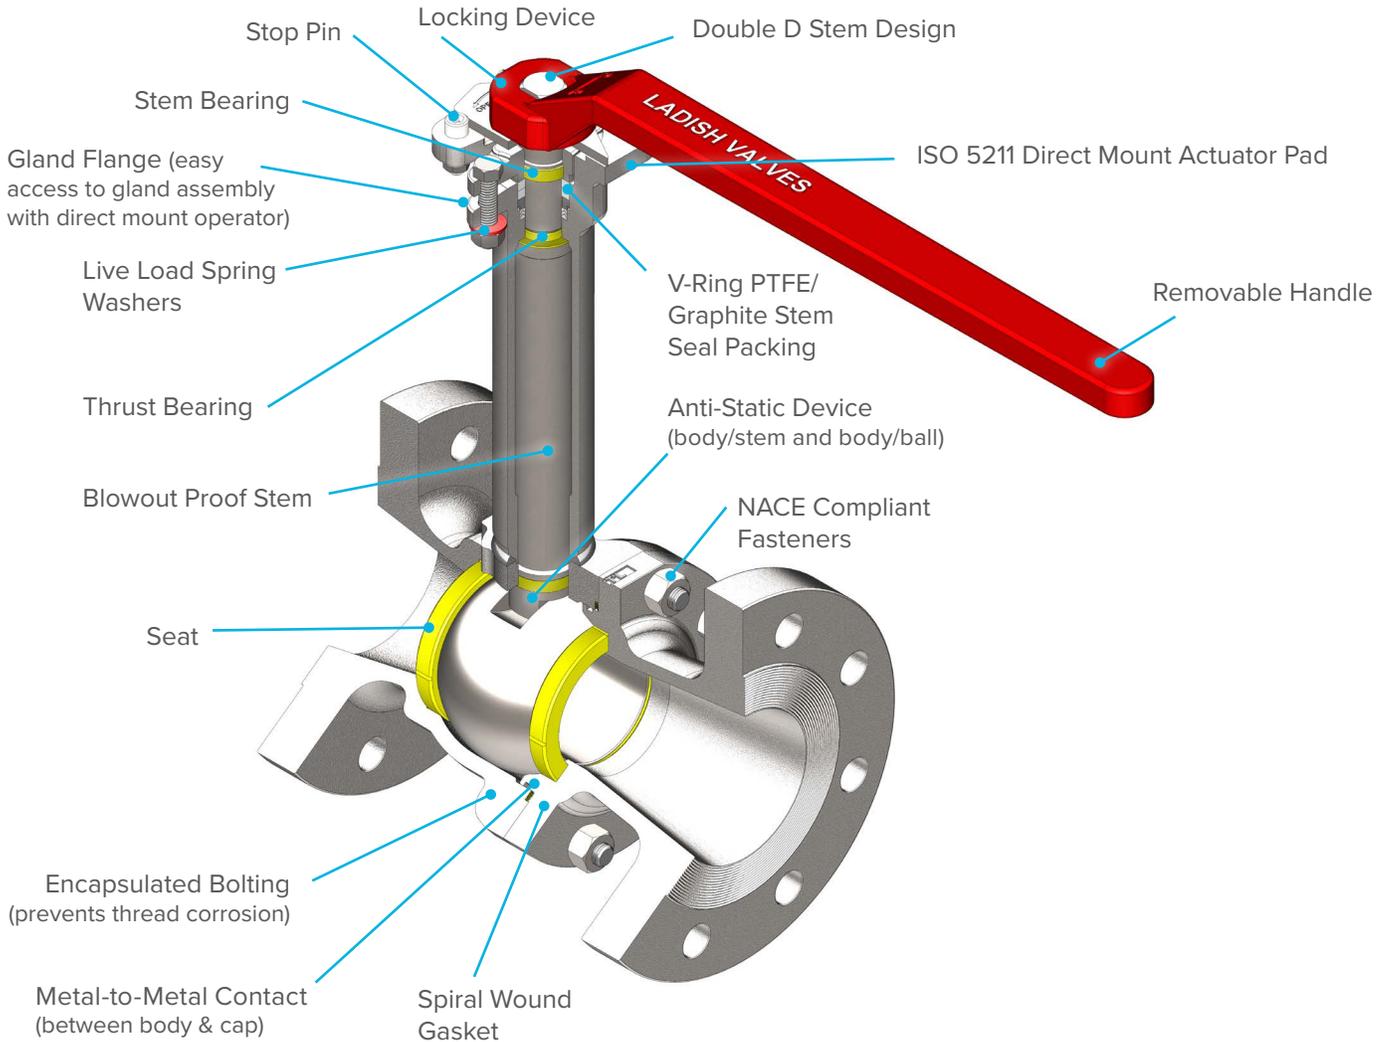

Ladish Valves exists to serve our customers. If you require anything outside the scope of this catalog, please don't hesitate contacting us. We would be happy to assist you.

P7 SERIES

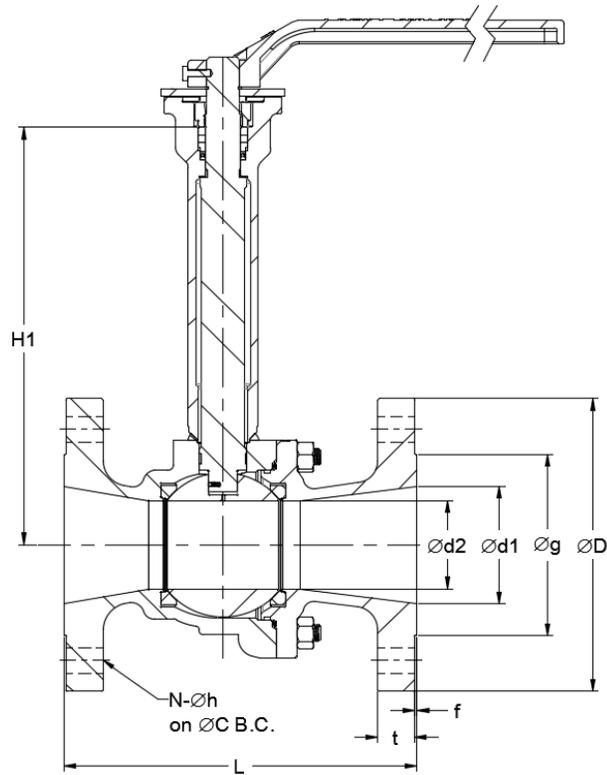

Two-Piece, Cast Cryogenic Standard Bore

- API 608, ASME B16.34, API 607, MSS-SP 134
- Tested in accordance to API 598
- Optional non-cold box and cold-box testing per MSS SP-134 or BS.6364
- Integrally cast extension on select sizes
- Class 150–600
- Double D and square stem available
- Dual V-ring PTFE/Graphite stem packing to meet API 607
- Live load spring washer for packing adjustment

CAST CRYOGENIC GATE VALVE

Design & Construction

- API 600, API 603, ASME B16.34, MSS SP-134, BS 6364, full port design
- Threaded, socket weld, butt weld ends class 150 thru 600
- Flanged ends class 150 to class 1500
- Hard facing on seating surfaces available
- Customizable bonnet extension
- Optional degrease, clean and seal to prevent contamination
- Flexible wedge with pressure relief vent
- Body/bonnet austenitic stainless steel castings offer excellent impact strength at low temperature and corrosion protection.
- Bolted body-bonnet joint fully enclosed gasket design, both on ID and OD, allows for leak tight design.
- Packing API 622 and API 624 qualified packing for low fugitive emissions protected from freezing by extended column of insulated gas.

CAST CRYOGENIC GLOBE VALVE

Design & Construction

- API 623, ASME B16.34, MSS SP-134, BS 6364, full port design
- Threaded, socket weld, butt weld ends class 150 – 600
- Flanged ends class 150 – 1500
- Hard facing on seating surfaces available
- Customizable bonnet extension
- Optional degrease, clean and seal to prevent contamination
- Rising, non-rotating, one piece stem design available
- Body/bonnet austenitic stainless steel castings offer excellent impact strength at low temperature and corrosion protection.
- Bolted body-bonnet joint fully enclosed gasket design, both on ID and OD, allows for leak tight design.
- Packing API 622 and API 624 qualified packing for low fugitive emissions protected from freezing by extended column of insulated gas.

FORGED CRYOGENIC GATE VALVE

Design & Construction

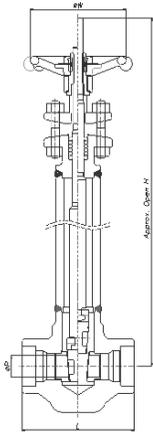

- API 602, ASME B16.34 , MSS SP-134, BS 6364
- Full and reduced port available
- Threaded, socket weld, butt weld ends class 800 and 1500
- Flanged ends class 150 – 1500
- Hard facing on seating surfaces available
- Customizable bonnet extension
- Optional degrease, clean and seal to prevent contamination
- Body/bonnet austenitic stainless steel forgings offer excellent impact strength at low temperature and corrosion protection.
- Bolted body-bonnet joint fully enclosed gasket design, both on ID and OD, allows for leak tight design.
- Wedge/seat solid wedge design constructed in forged or investment cast steel. Seating surfaces use Stellite® to prevent seizing and galling.
- Packing API 622 and API 624 qualified packing for low fugitive emissions protected from freezing by extended column of insulated gas.

FORGED STEEL CHECK VALVES

Design & Construction

- API 602, ASME B16.34, MSS SP-134, BS 6364
- Tested in accordance to API 598, ASME B16.34
- Hard faced seating surfaces available
- Threaded, socket weld and butt weld ends available class 800 and 1500
- Flanged ends available class 150 – 1500
- Full and reduced port available
- Body/cover austenitic stainless steel forging offering excellent impact strength at low temperatures and corrosion protection.
- Body-bonnet joint fully enclosed gasket design.
- Piston/disc seating surfaces are stellite faced to assist in avoiding seizing and galling. All checks can be fitted with TFE inserts.

FORGED CRYOGENIC BELLOWS GATE VALVES

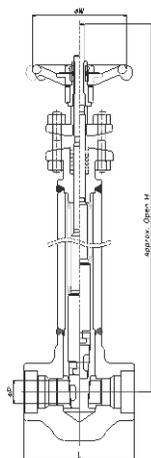

Design & Construction

- API 602, ASME B16.34, MSS SP-134, BS 6364
- Full and reduced port available
- Threaded, socket weld, butt weld ends class 800 and 1500
- Flanged ends class 150 – 1500
- Hard facing on seating surfaces available
- Customizable bonnet extension
- Optional degrease, clean and seal to prevent contamination
- Multi-ply bellows for extended life
- Body/bonnet austenitic stainless steel forgings offer excellent impact strength at low temperatures and corrosion protection.
- Bolted body-bonnet joint fully enclosed gasket design, both on ID and OD, allows for leak tight design.
- Wedge/seat solid wedge design constructed in forged or investment cast steel. Seating surfaces use Stellite® to prevent seizing and galling.
- Packing API 622 and API 624 qualified packing for low fugitive emissions protected from freezing by extended column of insulated gas.

HOW TO ORDER

Cast & Forged Cryogenic Multi Turn Valves

The Ladish Valves figure number is comprised of 16 alpha numeric digits defining the required product in detail. If you need assistance, give our knowledgeable sales staff a call at 281.880.8560 with the leading 4 digits and we can guide you through the rest. Our aim is to provide you with precisely what you need.

EXAMPLE:

HOW TO ORDER

Cast Flanged Floating Ball Valve

The Ladish Valves figure number is comprised of 16 alpha numeric digits defining the required product in detail. If you need assistance, give our knowledgeable sales staff a call at 281.880.8560 with the leading 4 digits and we can guide you through the rest. Our aim is to provide you with precisely what you need.

EXAMPLE:

P915-L650-GF00-C20M 2", CL150, CF8M Cryogenic Ball Valve with 316SS Trim, Graphite Packing, Fire Safe, Meets NACE MR0103 Material Requirements
