

# CBJT

**Steam or Hot Water  
Firetube Boiler  
100 to 1,600 HP**

# Lowest Total Cost of Ownership

The total cost of owning any boiler is determined by more than the initial equipment cost. Total cost of ownership includes operating, maintenance, unplanned downtime, and years of service. When an external burner is preferred, the CBJT model offers the lowest total cost of ownership for this style burner and boiler combination.

The CBJT firetube is a completely integrated boiler and packaged burner system featuring the revolutionary EX technology. Extraordinarily efficient and capable of meeting low NOx requirements, the CBJT provides a high-value solution with next-generation engineering.

## Cornerstones

Every piece of Cleaver-Brooks equipment is developed and manufactured with these in mind.

**Safety**

**Efficiency**

**Reliability**

**Sustainability**

Through a commitment to research and development, Cleaver-Brooks is the sole provider of integrated boiler/burner/controls solutions and is a leading manufacturer of boiler room equipment across commercial, institutional, and industrial markets. Many of our components are specifically engineered, ensuring that Cleaver-Brooks high-quality products deliver superior performance.

# Packaged for Optimum Performance

The CBJT has been designed to serve a wide range of applications. Built to utilize different Cleaver-Brooks exclusive technologies, from the robust pressure vessel, to the burner and controls, the CBJT is the ideal choice when an external jet burner preferred.

## Flexible Design Configurations

Offered in two design configurations, the CBJT is a great choice for your next boiler.

### Classic

- ▶ 4-pass plain tube design
- ▶ 5 Sq foot of heating Surface Per HP
- ▶ Robust waterback construction
- ▶ Fuel flexibility
- ▶ High and Low pressure steam or hot water

### Enhanced

- ▶ 2-pass EX tube construction
- ▶ Up to 10:1 Turndown available
- ▶ Robust waterback Construction
- ▶ High pressure steam or hot water
- ▶ Boiler package is UL listed ensuring quality and safety

## Burner and Controls Package

CBJT can be partnered with a number of Cleaver-Brooks designed burners to meet performance or emissions requirements for almost any project. Each burner offered has been tested with the boiler to ensure it meets the high standards of a Cleaver-Brooks product.

## Advanced Heat Transfer Tube

With the use of advanced engineering methods, Cleaver-Brooks designed the EX tube technology to increase heat transfer up to 85% over traditional boiler tubes. This allows for optimal furnace design and help produce the lowest possible emissions.

# Hawk Integrated Controls System

The Hawk Control, which serves as the brain of the CBJT packaged boiler, enables you to run your boiler safely and efficiently.

- ▶ Completely integrated boiler/burner control is fully tested during development
- ▶ Automatically tunes boiler for changes in environmental conditions
- ▶ Combustion air fan vibration monitoring
- ▶ Linkageless control eliminates single-point control hysteresis
- ▶ Optional VSD control reduces fan horsepower load
- ▶ Advanced emissions controls with NOx trim option
- ▶ Unlimited options for system customization and optimization
- ▶ NFPA and UL<sup>®</sup> compliant for maximum safety
  - Return to Pilot option for immediate ignition
  - Hawk water level control, draft control, third fuel option
  - Integrated deaerator and Host Panel controls

## Industry Leading Interface

The Hawk is the most powerful boiler control system available in the industry. Its user-friendly interface features:

- ▶ Highest resolution screen on the market
- ▶ Intuitive navigation
- ▶ Built in maintenance manual
- ▶ E-mail and text alerts

## Prometha<sup>®</sup> IoT-Connected Boiler Solutions

Prometha collects critical data and provides actionable insights, making boiler optimization and troubleshooting simple. With Prometha, you can:

- ▶ Access boiler insights from anywhere, 24/7/365
- ▶ Increase operational efficiency
- ▶ Lower total cost of ownership
- ▶ Prevent or reduce unplanned downtime

# Cleaver-Brooks Jet Burner Solutions

Engineered by Cleaver-Brooks to be a fully compatible boiler/burner package featuring excellent fuel to steam/water efficiency, space savings, and low emissions. The versatile Cleaver-Brooks CBJT also has the flexibility to add desired options to further enhance the package.

## 100 to 1,600 HP

### Packaged Burner

- ▶ High efficiency
- ▶ Easy to maintain
- ▶ System matched burner
- ▶ <30 ppm NOx emissions solutions available
- ▶ Single source manufacturer

Designed and tested with each boiler, ProFire packaged burners deliver the highest levels of performance and reliability.

## Flexible Burner Options

The versatile CBJT can be easily upgraded with options during manufacture, or it can be retrofitted later.

The standard ProFire burner can be upgraded to provide maximum combustion efficiency and low NOx technology.

## Controls

- ▶ Universal controls options available

## State-of-the-Art Manufacturing Facility

Our commitment to engineering the finest, most durable components provides a robust burner built to exacting specifications and unmatched fit and finish. Maximum efficiency burners in low- or ultra-low emissions proudly built in the USA in certified manufacturing facilities.

# Waterback Configuration

The CBJT is offered in a 2-, 3- or 4-pass waterback design. It is ruggedly constructed for hot water or low and high pressure steam applications. For customers who prefer the jet burner design, the CBJT provides the highest value, with a focus on safety, ease of maintenance, lowest emissions and the flexibility to add desired options to further enhance the package.

## Waterback

- ▶ Longest service life
- ▶ Little to no refractory in rear door
- ▶ Requires front tube pull
- ▶ Fully water-cooled design reduces stress due to cycling

## Classic Design

Cleaver-Brooks set the standard in Firetube design with the 5 Sq ft of heating surface per HP and 4 pass construction. The CBJT classic design is built off of this standard and allows customers the reliability and flexibility to burn many different fuels.

## Enhanced Design

Using EX technology - the CBJT enhanced design offers 2 pass construction and a smaller footprint compared to traditional 3 and 4 pass boilers, as well as very high part load efficiencies making the CBJT 2 pass boiler a great choice for many applications.

## Reliable and Consistent Manufacturing

Being a single source expert provider, we control the manufacturing process to provide consistency and repeatability with our products. Our equipment is manufactured in state of the art facilities and under demanding quality control requirements using ISO standards.

# Flexibility to Meet Any System Requirements

## Minimize Start-up Time

Cleaver-Brooks has long been committed to engineering the most advanced and reliable boiler systems. By utilizing the highest-quality components to minimize downtime, our boilers can ensure you're making the most of your steam and hot water systems which also leads to quicker start time.

## Single Source Safety and Reliability

With coordinated research and development strategies, rigid testing and performance expectations, Cleaver-Brooks is dedicated to providing a world class boiler, burner and controls solution.

## Sustainable Emissions

Our dedicated Product Development Center has engineers that develops state of the art technology to advance our products for tomorrow's boiler and burner systems. With breakthrough technology, Cleaver-Brooks has attained low emission levels of NOx less than 30ppm and CO less than 50ppm.

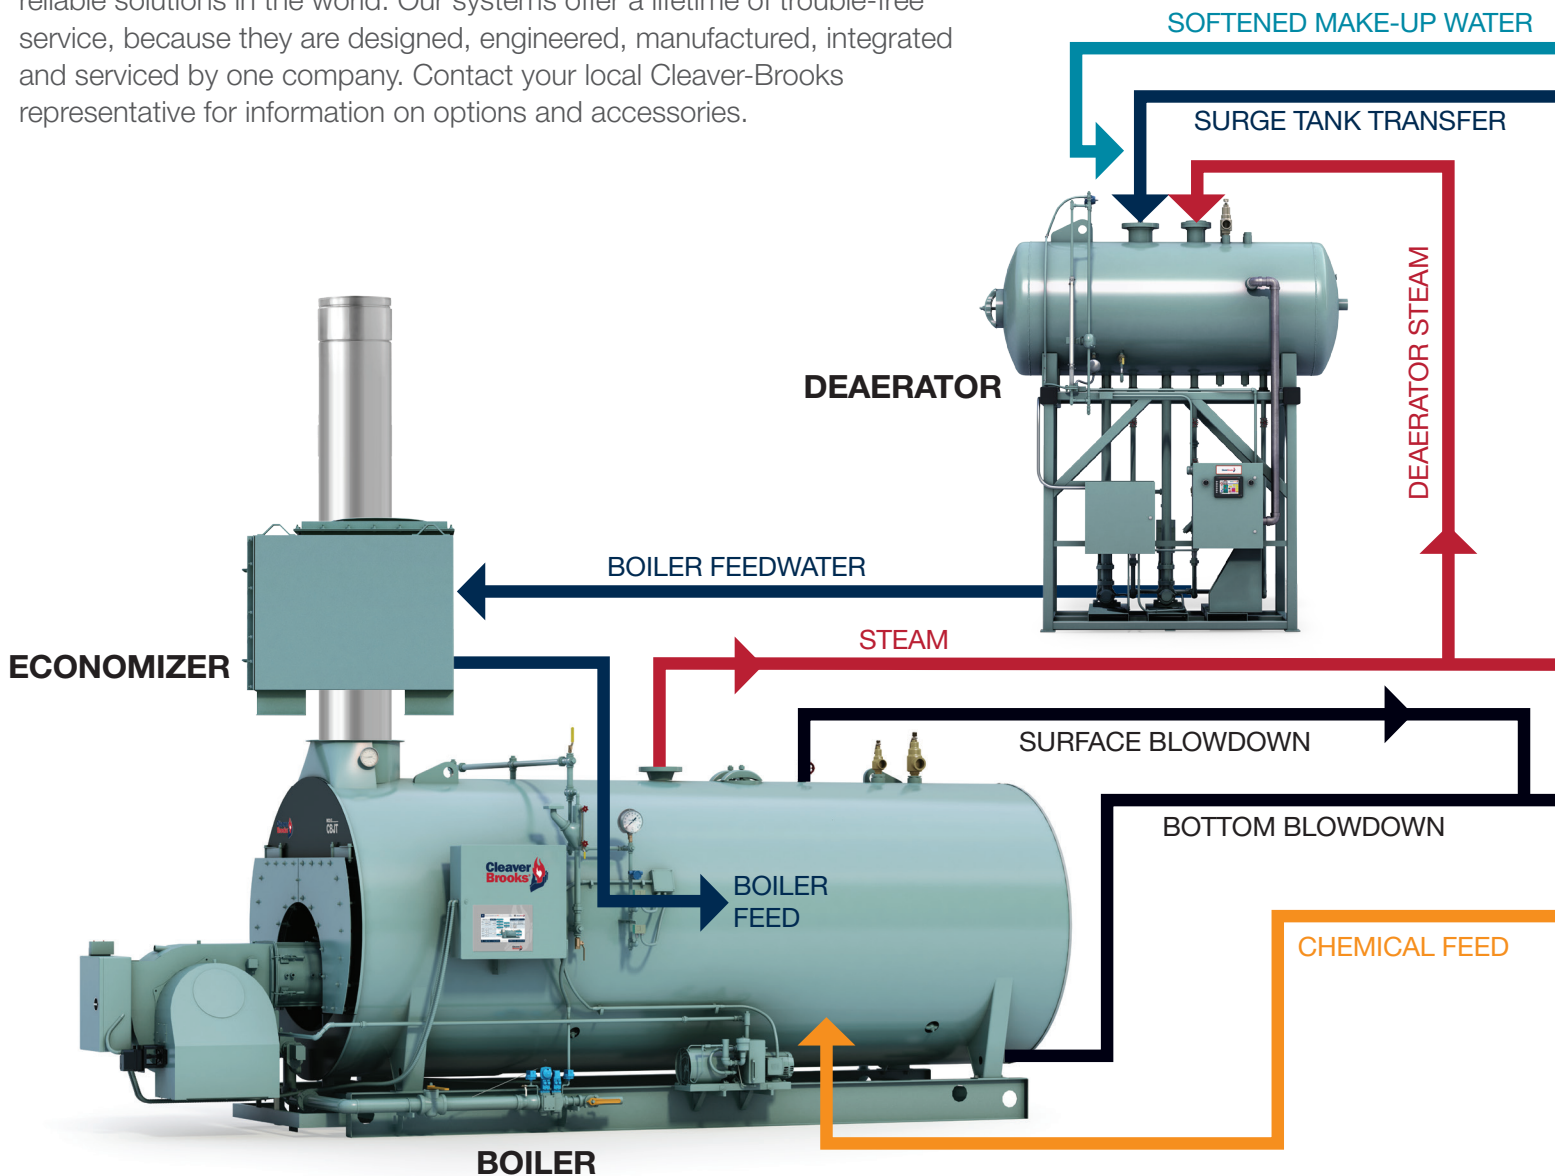

“The quality, durability and serviceability of Cleaver-Brooks is unmatched.”

**Scott Roman**  
HVAC Engineer  
Rockville General Hospital

# Take Optimization to the Limit

Cleaver-Brooks complete system integration produces the most efficient, reliable solutions in the world. Our systems offer a lifetime of trouble-free service, because they are designed, engineered, manufactured, integrated and serviced by one company. Contact your local Cleaver-Brooks representative for information on options and accessories.

## Advanced Controls

- ▶ Hawk boiler controls
- ▶ Prometha IoT Solutions
- ▶ Advanced deaerator controls
- ▶ Master panel

## Surge Tanks

- ▶ Collects and stores condensate
- ▶ Reduces makeup water and chemical usage

## Stack Economizers

- ▶ Non-condensing
- ▶ C2X-HE – 94% efficient
- ▶ Condensing

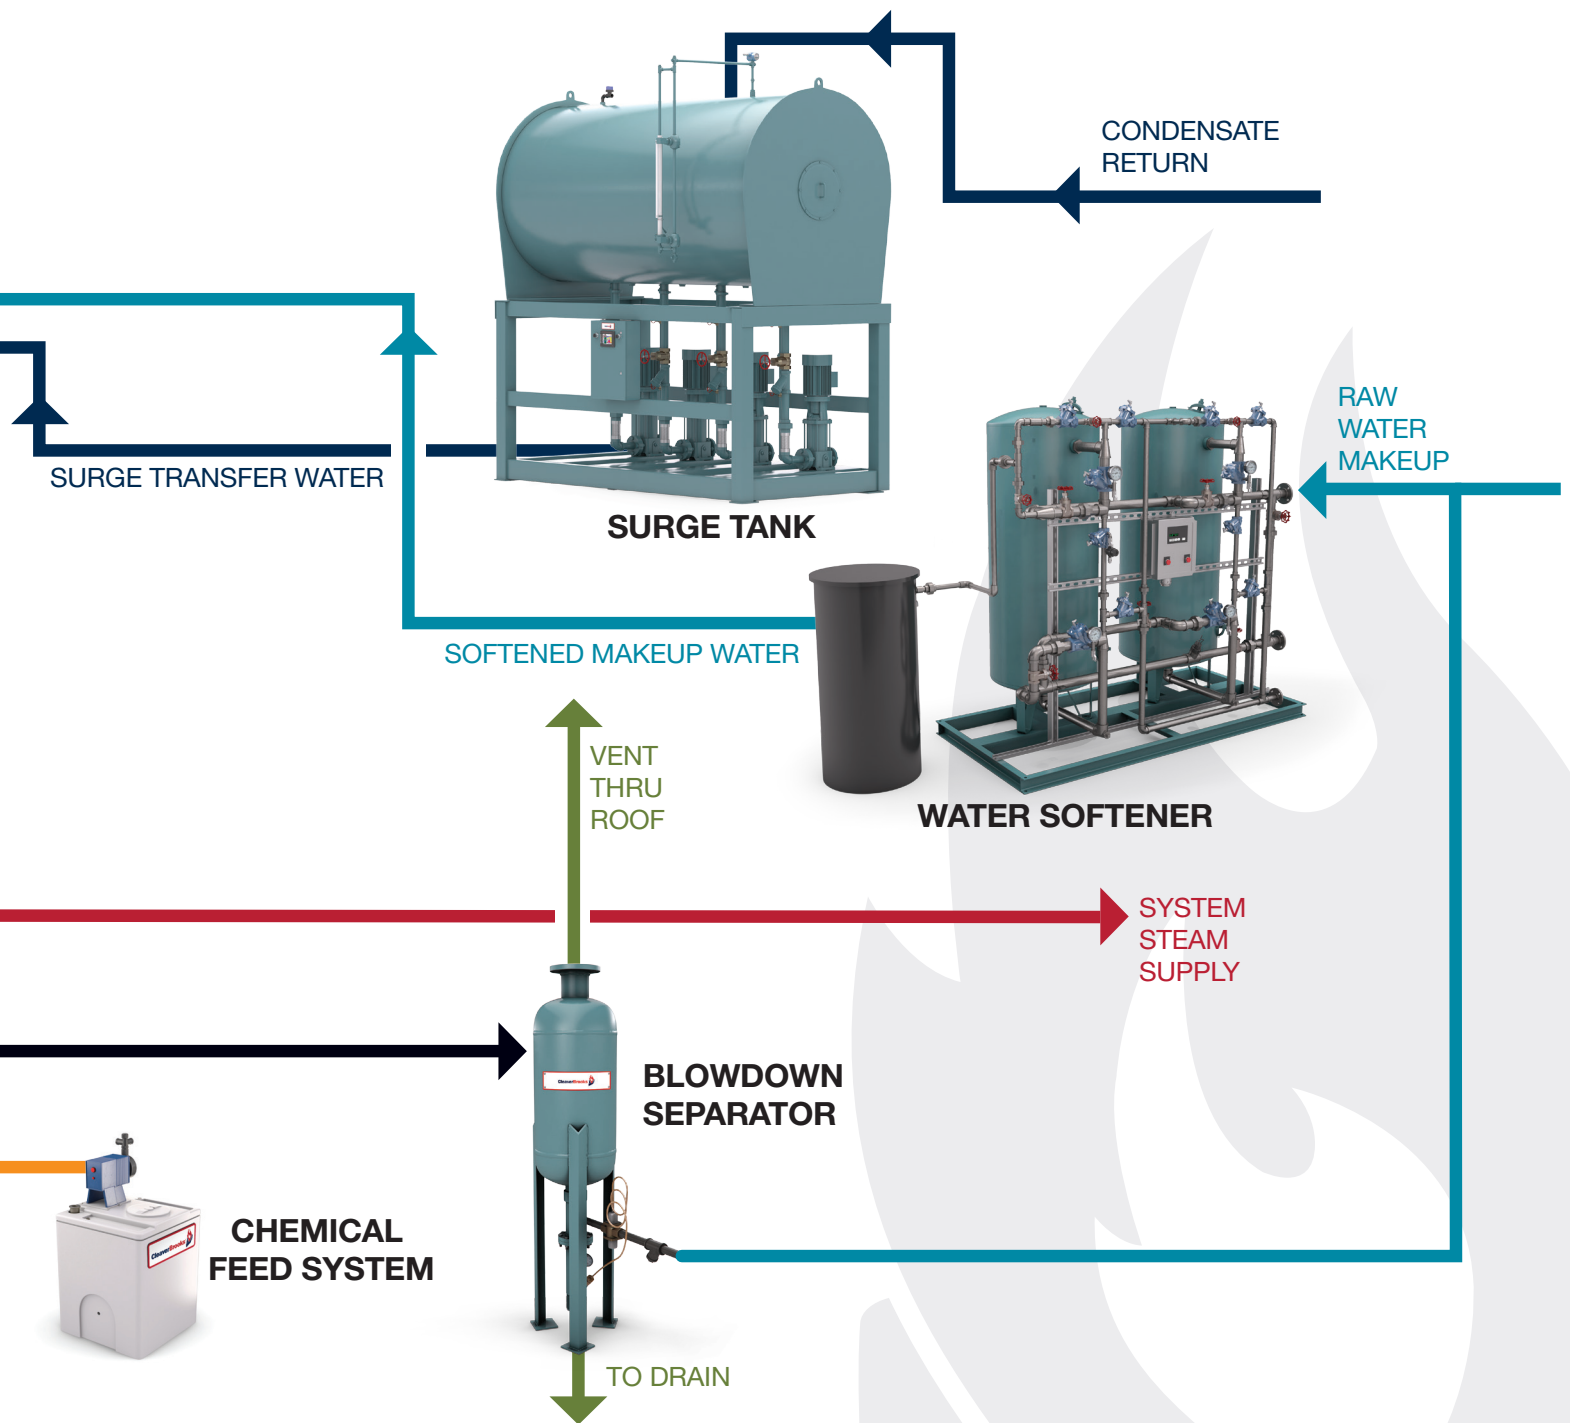

## High-Pressure Condensate Systems

- ▶ Improves overall system efficiency
- ▶ Integrated controls for high-pressure operation

## Deaerators

- ▶ Pre-heats boiler feedwater
- ▶ Removes dissolved gases
- ▶ Improves lifespan and efficiency of boilers

### Chemical Feed Systems

- ▶ Chemicals treat the boiler system to maintain peak efficiency and reliability
- ▶ Variety of options available depending on system specifics

### Duo Tank Systems

- ▶ Combines spray-type deaerator and surge tank
- ▶ Simplifies installation

### Water Softeners

- ▶ Removes minerals that will create scale within boilers
- ▶ Ensures long equipment life

### Blowdown Separators and Tanks

- ▶ Cools blowdown water to safe temperature for discharge to drain
- ▶ Required by code for most steam systems
